Thanks Cheryl. If it helps, let him know that I have been working on the site for 6 years.

I will ask my Supervisor if I can share it with you. I think that it was shared with Steve Elmore, Wisconsin Drinking Water Program Director.

I did ask Bruce yesterday and he said he had not received them. I can ask again when he is in the office.  
Cheers

Would you be able to ask Bruce if he has received EPA's sampling results? If not would you like me to ask if I can just forward it to you?

Cheryl Burdett

Hi Laura:

Sorry, if you just received an e-mail, I was not finished typing. I know we are looking to post all of our sampling results – no report just the raw sampling analyses and maps to EPA's website that we will make public. I can check and see if I can e-mail it to you if you need it right away because we have already shared it with WDNR.

Sincerely,

Cheryl Burdett

**Subject:** Request

Hi Cheryl,

I have heard there is a report for Central Sands Dairy and I am wondering if you can send it to me. I am interested in samples collected upgradient of land application field RDO-12. I have quarterly sample analytical results collected April 15, 2018, downgradient of RDO-12 (and upgradient of the production site). I am attaching the most recent report for production site monitoring. Please see Figure 1 for monitoring well locations. RDO-12 is adjacent to and north of the production site. Under our settlement agreement with the dairy, they are only growing alfalfa. Monitoring wells CSD-4 and CSD-8 are upgradient of the production site, downgradient of RDO-12. CSD-3S and 3D are considered upgradient background wells for the production site and are not considered to be downgradient of RDO-12.

Thanks,  
Laura
